

Vector Properties

Vector Basics

There are three persp

1. Physics perspective

- Vectors are Arrows pointing in space. It is defined by two properties
 1. Length
 2. Direction

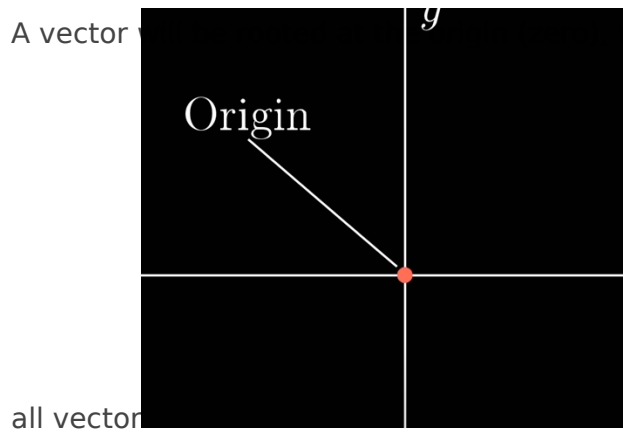

2. Computer Science Perspective

$$\begin{bmatrix} 2 \\ 1 \end{bmatrix} \quad \begin{bmatrix} 5 \\ 0 \\ 0 \\ -3 \end{bmatrix} \quad \begin{bmatrix} 2.3 \\ -7.1 \\ 0.1 \end{bmatrix}$$

- A vector is an *ordered list (array)* of number (scalars)

3. Mathematician (geometric) Perspective:

- A vector \vec{v} is a quantity which is the center of space and root of

Vectors are located on a coordinate system, in which Vector Multiplication and Vector Addition is performed
